Subject: ASPECT Support to Region 8

At approximately 1420 EDT, FOB received a call from Region 8 OSC McComb requesting ASPECT to provide georeferenced aerial imagery of an area (Silverton, CO – Cement Creek) impacted by an accidental release (via dam) of approximately 1 million gallons of contaminated water.

- ASPECT wheels up by 1330 EDT
- ASPECT expected to be on target approximately 1800 MDT
- Data (approximately 400 images) will be processed throughout the night if the lighting is acceptable. If not, photos will be taken first thing in the morning. Imagery will be provided to the Region first thing in the morning or early afternoon, respectively

The OSC's contractor was digging by a dam causing a breach. High media attention.

More to follow.
